LIVE YOUR PURSUIT

What Makes Us Tick

How do trains find their way through the mountains? Over streams? They use trestles! Trxstle ties together our common history and the landscapes where we find our favorite outdoor activities. Whether it's a trestle creating

the perfect eddy for trout holding water, acting as a land mark on the coast for incredible surfing or an old rail line granting access to single track and pow stashes, trestles serve as beacons to the best locations for fun.

At Trxstle, we strive to be the leader in purpose-driven, original fishing

and biking outdoor products - designed and engineered to carry specific gear in the best way.

We are committed to conserving the

wild places our outdoor pursuits take us through personal responsibility, individual work, and financial support to accredited organizations in

WATCH
OUR STORY**

The CRC System provides secure and convenient storage for your fully rigged fly rods with unsurpassed gear protection. Leave your gear on your vehicle full time in the extended 10' 4" mode, or quickly take the CRC System down and telescope it into its 44" carry mode. Equipped with suspended rod liners, reel padding, locking attachment to your vehicle, and a reel-up design - this is not your

average rod carrier.

At only 15 lbs, it's easy to bring the CRC System anywhere in carry mode. When you're ready to use your CRC System, mount it in any of its four telescopic lengths in minutes using our patented, locking, quick-clamp system.

REELS-UP

By storing your rod and reel in the "reel-up" orientation, the CRC System

prevents your fly rod from resting on the fragile guides and prevents damage to your gear when driving on rough and bumpy roads. This

design also provides snag free and unobstructed insertion and removal of your fly rod during use.

THIS THING HAS HELPED ME MAXIMIZE MY TIME ON THE WATER. IT ALSO HAS A REALLY SOLID BUILD WITH A SUPER SMART DESIGN. WELL WORTH THE INVESTMENT.

Inside of the reel housing, the "lead-in" trough makes it effortless to line up your fly rod and insert it easily into the CRC System, while also supporting the underside of the cork below your reel for unsurpassed protection during transport.

The rod liners of the CRC System are made of a soft-wall plastic that expands and contracts with the product in its various lengths.

The rod liners are completely sealed from the weather and offer a patented rod liner suspension system – meaning each rod liner is mounted on a spring system that fully supports and protects your fly rods during transport.

Inside the reel housing is a closed cell EVA style foam padding that prevents fly reels from being damaged from contacting the hard plastic shell.

Additional Specs:

- Holds two 10'4" rods
- Holds reels up to a 4.5" arbor
- Rod entry diameter: 1.6

NEW RELEASE! CRC SYSTEM v3.0

We're always listening to customer feedback on ways to improve our products, and constantly keep our ears open to what additions you'd like to see included in our catalog. You all spoke loud and clear - so we obliged!

Introducing the CRC System v3.0!

Featuring a completely redesigned reel housing, lid, plastics, and aluminum body. We've improved product security, user operation and overall strength immensely with these changes...but they don't stop there!

We are now offering the CRC System v3.0 in our standard anodized silver color and now with our **BLACKOUT**, all black anodized version!

We are also releasing the long-awaited **Euro Rod** version in both the black and silver options - accommodating fly rods up to **11'6" in length** with practically no additional weight added to the system.

And to round out the new v3.0 release, we are offering additional mounting clamp options, including an **all-new t-slot mounting adapter** for use with all new and existing CRC Systems.

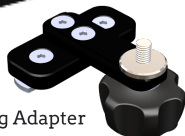

Be sure to check out our website for all the latest releases for 2023 - there's a bunch of them!

CRC v3.0 - Blackout

CRC Euro Rod - Blackout

T-Slot Mounting Adapter

NOW AVAILABLE IN BLACKOUT & EURO ROD VERSIONS!

We offer an array of useful accessories and add-ons for our rod carriers. From reel case lights for those early mornings and late evening sessions, to lock-and-key adapters for the stock mounting clamps, to shoulder straps for easy carry, and more!

New for 2023 - we're offering artist series fish skins for a custom look on your ride! From the talented workshop of artist Travis Martin.

ROD BOOTS

NEW FOR 2023

Made of braided polyester, Trxstle Rod Boots provide total protection for your fishing rods. Keep your rods rigged and ready, prevent line tangles and rod damage, and be ready to fish at a moments notice. Rod boots come in a **2-pack**.

Perfect for extra rod protection in Trxstle rod carriers. These fly rod sleeves keep gear safe and organized in watercraft as an on boat rod holder, create a safe and easy transport method for assembled rods, and more. Use the included reel leash to keep your rods secure inside these rod socks and use our tip loops to bundle multiple rods together for easy transport.

THE GERYON

**CHANGE THE WAY
YOU USE YOUR BIKE**

UNIVERSAL BIKE PACKING SYSTEM

The Geryon is the only universal rack system designed to work with any style of bike, from full suspension to road to e-bikes. Whether you're mountain biking, fishing, hunting, camping, gravel riding, or running errands around town, the Geryon will give you the on-bike storage you need.

The Geryon features all CNC'd aluminum components and a durable anodized finish. The front and rear decks are completely adjustable and modular, allowing you to setup the Geryon for your specific needs with only a 4mm hex key. There are provisions to strap almost anything onto the system as well as a series of mounting holes which can accommodate

accessories like our bow mount.

The Geryon mounts to any bicycle with standard components. Specifically, a 1 1/8" diameter threadless steerer and a common seatpost size. The system includes 27.2, 30.9 and 31.6 mm seatpost adapters. This allows the Geryon to be compatible with virtually any modern bicycle, from road bikes to

mountain bikes and even e-bikes.

The mounting concept allows you to add on-bike storage to full suspension bikes, high end frames without rack mounts, full carbon bikes, bikes with odd frame designs... the possibilities are endless.

WATERPROOF

CASES & FLY BOXES

THE BWC FLY BOX & MOUNTABLE WATERPROOF CASE

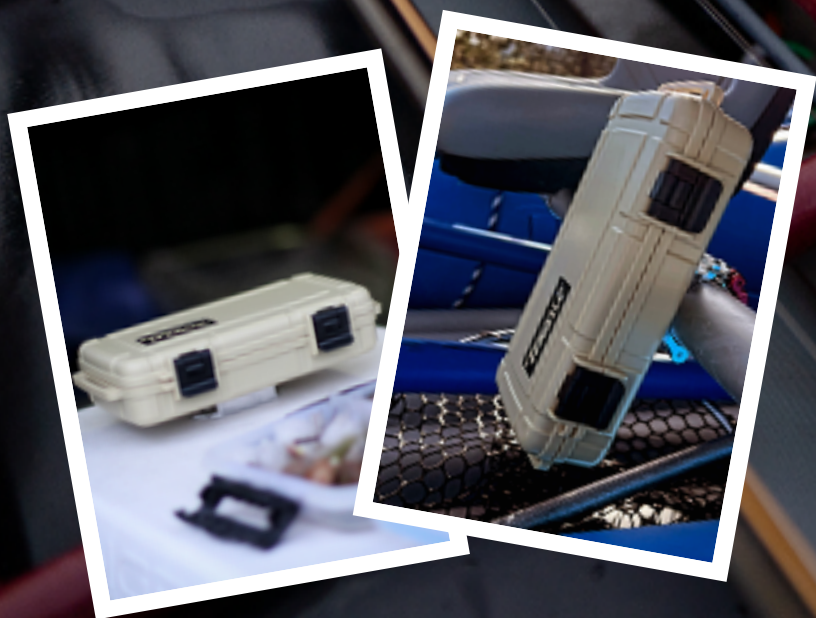

The Big Water Case is a waterproof fly box, phone case, travel wallet, and more! This case is jam-packed with unique inserts and attachment features so you can have one box that does it all.

Attach securely to your boat or raft using our exclusive dual strap mounting points or use our clampIT style mounting feature on the rear of the case.

CAN YOUR FLY BOX DO THIS?

RIVER LOCKER

The Trxstle River Locker is designed to take abuse and still keep your essentials safe. Secure it to your drift boat, use it on your SUP, throw it in your pack - however you use it, the River Locker has you covered.

To keep everything neat, tidy, and held in place while stored inside, we equipped the box with two interior elastic straps, EVA foam insert and mesh pocket. The para-cord style lanyard is included as well for secure attachment to whatever you need.

And before you ask - yes, the river locker is waterproof, buoyant, dust proof, and shock proof.

COMING SOON!

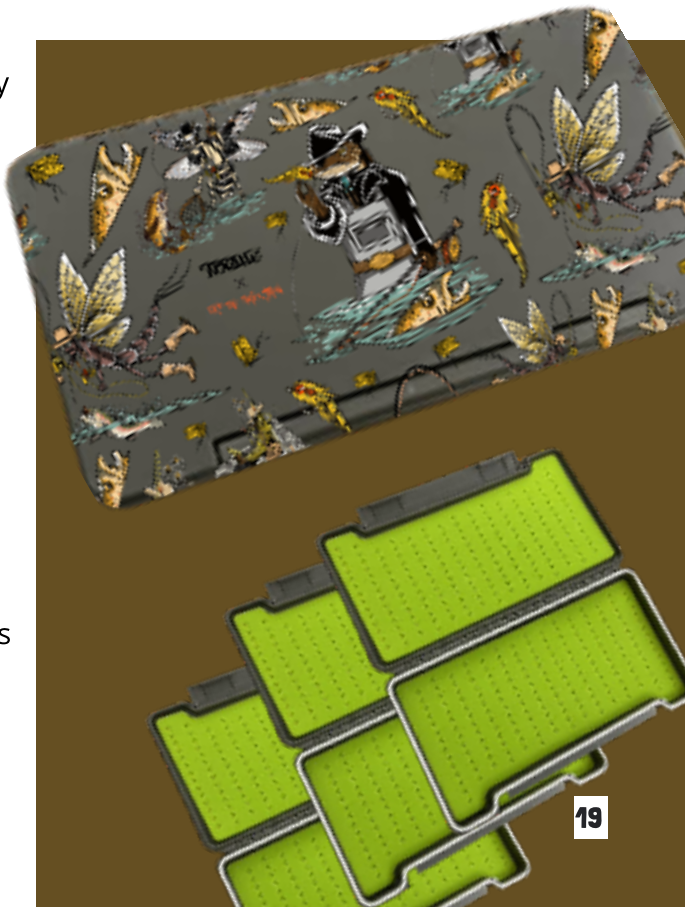

TOUGH TO SWALLOW ARTIST SERIES FLY BOXES

NEW artist series fly boxes feature seamless, full coverage artwork on the exterior of the boxes from various local artists we are proud to work with!

The interiors feature a watertight rubber seal with silicon fly inserts on both sides.

Exterior dimensions of seamless print boxes are approximately:

9" x 5" x 1"
